TECHNICAL OVERVIEW

# ZEISS OTUS

Imagine the legendary Arri/Zeiss Master Primes, renowned for their exceptional image quality and cinematic rendering, distilled into a full-frame essence. That's the magic of the rehoused Zeiss Otus and Milvus lenses.

Crafted with meticulous attention to detail, these lenses represent the pinnacle of modern optical design. Each element, meticulously polished and coated with Zeiss's renowned T\* anti-reflective coating, contributes to an image of unparalleled clarity and precision. Sharpness, micro-contrast, and color rendition are simply breathtaking, capturing every nuance with a fidelity that rivals even the most revered cinema lenses.

But the Otus and Milvus lenses offer more than just technical perfection. They possess a unique character, a subtle blend of clinical precision and artistic nuance. Their images are rich with detail, yet retain a natural softness that flatters subjects and creates a sense of depth and dimension.

Rehoused in our precision-engineered housings, these lenses become even more versatile tools for cinematic storytelling. They retain their exceptional optical performance while gaining the ergonomics and functionality demanded by professional filmmakers.
